EDUCATION

University of Nevada, Las Vegas (UNLV)

Las Vegas, NV

- Bachelor of Science in Computer Science
- Minor in Mathematical Science

Expected December 2026

National Cyber League (NCL) Fall 25 Ranked: 17th out of 459 (Team Competition) | Score: 2855/ 3000

- Utilized Kali Linux and various security tools to solve beginner to intermediate challenges in Forensics

Relevant Coursework

- Data Structures, Database Management Systems, Operating System, Internet Security

TECHNICAL SKILLS

Languages: C/C++, HTML, CSS, SQL (HeidiSQL/MariaDB), Java

Tools: VS code, Figma, Git, GitHub, Proxmox VE

Operating Systems: Windows, Linux, macOS

WORK EXPERIENCE

Quality Assurance (QA) /Software Engineering Intern

Regara

August 2026 – Present

- Performed manual QA and regression testing in a staging environment across multi-step accounts, product configuration, document management, and submission workflows, validating data persistence, navigation behavior, and cross-feature information flow.
- Identified, documented, and reported UI/UX and functional defects, including edge cases involving international characters in uploaded filenames.
- Supported release verification by testing core workflows and confirming fixes for previously reported issues.

Teaching Assistant – CS135 (Introduction to Programming in C++)

August 2026 – Present

UNLV – Howard R. Hughes College of Engineering

- Assisted students in debugging C++ assignments by explaining compiler errors and identifying why their code's logic did not produce the intended behavior.
- Guided students in improving code structure, such as recognizing when a loop was the appropriate solution instead of a chain of if-else conditionals, reinforcing core control-flow concepts.

System Administrator Assistant

September 2024 – January 2025

UNLV – Howard R. Hughes College of Engineering

- Collaborated in a two-person team to develop the front-end of a website using HTML and CSS, delivering a functional and accessible interface for a CS professor website.
- Provided front-line IT support (hardware/software troubleshooting, OS installs) and assisted with Proxmox VE server deployment and VM configuration.

TECHNICAL PROJECTS

BatchGrade – Automated Code Grading Systems for Educators | Front-end Developer

June 2025 – Present

- Conceptualized and designed an automated code-grading platform to address workflow challenges faced by computer science teaching assistants lacking institutional grading tools.
- Conducted user research to identify teaching assistant pain points and translated findings into user flows, high-fidelity UI/UX wireframes, and an interactive prototype using Figma.
- Developed a front-end prototype featuring intuitive dashboard navigation, grading metrics visualization, and a file-submission workflow.

The Sphere – XO Student Design Challenge 2026 | Top 30 Selection (University Group)

January 2026 – March 2026

- Conceptualized and designed a 360° immersive experience for the Las Vegas Sphere, translating the infinite digits of π into a visual narrative.
- Rapidly learned and applied Meta VR tools independently to develop project concepts within a limited project timeline.
