EDUCATION

University of Nevada, Las Vegas

Las Vegas, NV

- Bachelor of Science in Computer Science
- Minor in Mathematical Science

January 2023 – Expected December 2026

National Cyber League (NCL) Fall 25 Ranked: 17th out of 459 (Team Competition) | Score: 2855/ 3000

- Utilized Kali Linux and various security tools to solve beginner to intermediate challenges in Forensics

Relevant Coursework

- **Computer Science:** Operating System, Database Management Systems, Data Structures, Internet Security
- **Mathematics:** Calculus I, II, III, Linear Algebra, Differential Equation I, Statistical Methods I

TECHNICAL SKILLS

Languages & Tools: HTML, CSS, C/C++, SQL (HeidiSQL/MariaDB), Java

Operating Systems: Windows, Linux, MacOS

Tools: VS code, Figma, Microsoft Office, Google Suite, GitHub, Proxmox VE

WORK EXPERIENCE

System Administrator Assistant

September 2024 – January 2025

UNLV – Howard R. Hughes College of Engineering

- Developed the front-end of a website in a two-person team using HTML, CSS, delivering a functional and accessible interface for a CS professor project
- Provided front-line IT support and managed operations by troubleshooting hardware and software issues across UNLV campus offices including printer configuration, OS installation, and workstation setup documenting resolution steps to build institutional knowledge
- Observed and assisted in virtual server deployment and maintenance using Proxmox VE, gaining hands-on exposure to VM configuration, infrastructure documentation, and system reliability workflows

TECHNICAL PROJECTS

BatchGrade – Automated Code Grading Systems for Educators | Front-end Developer

June 2025 – Present

- Applied responsive web design principles to ensure platform accessibility across various devices, improving potential onboarding efficiency for educational users
- Conceptualized and designed an automated code grading platform to solve workflow inefficiencies for computer science teaching assistants (TAs) lacking institutional grading tools
- Conducted user research to identify TA pain points, translating requirements into high-fidelity UI/UX wireframes, user flows, and an interactive landing page using Figma
- Developed the front-end prototype focusing on intuitive dashboard navigation, clean data visualization for grading metrics, and a seamless file-submission interface

The Sphere – XO Student Design Challenge 2026 | Top 30 Selection (University Group)

January 2026 – March 2026

- Independently conceptualized, storyboarded, and designed a full 360° immersive VR experience for the Las Vegas Sphere, translating the infinite digits of π into a visual cosmic narrative, stars forming a blackhole, converging into a pie
- Demonstrated rapid adaptation to unfamiliar technology by self-teaching Meta VR tools from scratch within a tight project timeline
- Produced structured design documentation for three distinct viewing angles (Strip, airport, golf course), applying attention to technical constraints and multi-audience requirements
